

VINYL

Signex Product Cut-Sheet

OVERVIEW -

Vinyl is simple, very effective and one of the most affordable signage options. It's also quite versatile. Essentially it's a sticker or a decal. As technology has progressed more and more vinyl variants have been created. Now there is virtually no surface that can't be covered with vinyl.

ETCHED VINYL -

Etched vinyl is a very popular option. It's often used as a privacy film because it still allows light through. It can also be used for text and logos.

APPLICATIONS -

Nowadays there are vinyl types that can adhere to virtually any substrate. Surfaces that used to resist vinyl in the past, such as brick or drywall, can now be covered using modern vinyl products.

PRINT VINYL -

This is by far the most versatile option because you can customize this vinyl to what ever you need. Print vinyl is often used in car-wrap applications.

REMOVABLE -

There are low-tack vinyl options that can be moved from location to location. Low-tack products can even be installed on painted drywall and then later removed with no damage done to the paint.
